## BIO

Architect, subject expert at the Architectural Design Laboratory of the Department of Architecture of the University of Florence, endowed with a scholarship for scientific research in the same Department.

He studied at the School of Architecture of the University of Florence, where he graduated with maximum marks in 2020 with a thesis in architectural design with the title *Useless emptiness. Project proposal for the redevelopment of two squares and a new Town Hall for the city of Viareggio* (supervisor prof. Fabio Capanni, co-supervisor prof. Roberto Bologna).

Since 2016, while still a student, he has collaborated with professors Fabio Capanni, Simone Barbi and Roberto Bosi in teaching design labs (Architectural Design Laboratory, Architecture and Structure Laboratory, Interior Design Laboratory) at the School of Architecture of the University of Florence. Since 2020, he is a lecturer at Prof. Fabio Capanni's Architectural Design Laboratory

In 2021 and 2022 he holds two research fellowships with the title "Studying the types of natural light in architectural design", at the School of Architecture of the University of Florence.

He carries out design activities, combining professional practice with participation in national and international competitions. You can view the personal portfolio of selected projects at the link below: <https://drive.google.com/file/d/1oZomEv5j8jj8ipOmnamUy1nwEfeHrcFU/view?usp=sharing>.

He carries out research activities, focusing mainly on the urban value of architecture, on the role of public space within the ancient and contemporary city, on the characteristics of minor architecture and its relationship with monumental architecture, on the role of natural light in the architectural project, and the relationship between image and project.
